

Mortised String Staircase

- the most frequently used type of staircase
- treads are mortised into the strings

Cut String Staircase

- lightened type of staircase
- treads are mounted onto both strings
- a formerly widespread type

Spiral Staircase

- answering the space saving demand
- architecturally attractive

Structural Handrail Staircase

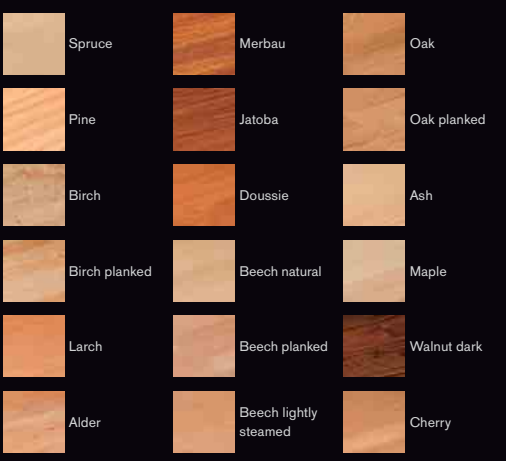

- this new type of staircase is popular for its modern futuristic design and its airy construction

- Full glass treads and balustrades are also available, with or without LED illumination.
- LED illuminated glass panels can be incorporated into any timber tread.
